I found a Michaels flyer in my news paper, it was for 40% off.I went over a found a nice light,very reasonable with the coupon.I also got a magnifier that fastens to the base.The magnifier part was great,but it clamped on the base with a plastic bracket. I almost broke it putting it on.I am taking that back and keeping the light.I will look around for a magnifier. Thanks again for all the input.
