Hi guys, I usually subscribe to American Angler and Fly fisherman magazine. I just realized that both have run out. What are you guys reading if any? I am beginning to feel mags are a bit of a rip off anymore. Way to many ads, and the cost for issue ratio keeps climbing. Most info is usually useless for my fishing locations. I will admitted though that I love looking through them and catalogs as well. I think most of us can rely on the web for most info we seek as well.
