Hi RC - Most tippet rings I've found come on either a snap swivel, or a small safety pin. If not, you can put them on one.

It's a lot easier to tie your leader material on to the ring closest to the tip of the pin or swivel while the ring is still on it. There's plenty of room to fit the leader material through, and you don't have to worry about dropping the tiny little things.

Doing it this way allows you to have something to pull on as you tighten the knot, and you don't have to open the snap swivel/safety pin until the knot is completed.

Beats crawling around on the carpet with a flashlight. 😊
