The 2013 GPS Fishing Guide updates for Garmin are now available!

http://gogalpublishing.com/home/Garmin_Update.html

As I had mentioned before, anyone who ever purchased a GPS Fishing Guide will now receive free updates. Originally, I had offered only one year of free updates however I have changed my policy for the benefit of all.

I've also made the update process easier and eliminated the need to register you product and remember your username and password. All you have to do is go to the update page above and follow the instructions.

I'd love to hear from some of my PAFlyFish.com customers about how this new update process works. Please feel free to give me a call with your comments. The phone number is at the bottom of the update page.
