In the GPS Fishing Guide, many of the destinations take you directly to Access and Parking however many of the waters listed do not have any formal access or parking areas so you sometimes have to be creative. Some waters don't even have road access and must be hiked to.

I have tried as much as possible to get you to places where you can actually park your car and fish, I have traveled all over PA using the product myself and will continue to make improvements. While it's not perfect, I use it all the time and have fished many streams I would otherwise never have found.
