I'm going to the keys next week. I'm bringing my 8wt with me. The best flies I have found are roaches looks like little crabs or shrimp. Jacks, mangroves and bones are what I'm targeting this time. I'm going to be near big pine keys not key west so there is a lot more wade fishing for me. Last year I got a lot of mangroves and little cudas. Bones were a lot harder to target but did hook one, never brought it to hand though. It's a good time down there I have my boat there already so ill be going offshore and light tackle for some sailfish and Bonita. Good luck ill keep you updated on my trip
