Be skeptical all ya want, I along with a few others have caught them. Not saying there is a lot but they are there. Temps might be 70-80 on surface but the deeper water is cold. Browns can get into to tidal water at trenton and below there the water is 40' or deeper. November is best time for them. Kenny Schram (r.i.p.) did a slide show for Buck's TU one year and showed them. Its not an every day thing you have to put your time in. The river tigers are easier to catch if you want big trout below frenchtown to new hope. how many guys are fishing the delaware in those areas in nov.-dec. ? not many I'm sure, especially fly rodders. and looking for trout too..probally none. Even when we did it there were no others on the river...just like fishing for shad in march we caught them when no one else did..
