URL:

We should have 2 versions of a waterproof fly box, our hand made wooden fly box, and accessories in by February.

2 Fly boxes are double-time injected to help make the box 1 piece and drastically improve the ability to keep water out. One will be a swing leaf design, the other a double sided with clear lids.

Still working on the design of the wooden box, but hopefully we'll have some out by the end of February. Hand made with logo laser burnt into it.

Accessories include nippers with knot tying tool, hemostats, and zingers.

Keep in touch, we should have some sales going on to kick these products off!
