First of all sneakers aren't made for wading. Oh I used sneakers when I was a kid for things like getting in and out of canoes, but that's about all they are good for with relation to water.

There are many different wading boots for many purposes, like long hikes into the stream, they make light weight boots for that. That's what I use for wet wading as a matter of fact. If you're not hiking anywhere you can limit the types of boots in your inventory to probably 1 pair.
