Fade,

Yeah, strange weather indeed! I see the same thing, the birds don't seem to migrate like they did when I was a kid? But at least we will get some "cold" weather for the next couple weeks?

We need it to kill the bugs, and the weeds in the lakes? Last year we didn't get any ice at all. Feb was short sleeve weather for the most part.

The last half of Jan should be the coldest weather of the year..... so bring it on!
