I fished the SR on Sun 12th & Mon 13th, mid river 2A - Pineville area, fish where moving through in AM each day, as bite was better in AM, and dropped off at mid-day and picked back up near end of day. They continue to come in from lake from now until spring. We had guy who fished DSR on Sun at lodge we stayed at and he had good day, landing 4/steelhead. Vast majority are in upper half of river, but you will continue to have fish enter river all season long. Don't think that mid or low river is not holding fish, it still worth fishing lower half of river at this time of year.
