Mike- I discovered this technique about this time last year after reading George Daniel's book. I thought it was crazy until i tried it. It flat out revolutionized my nymphing. I make my own leaders using a formula in George's book.

5' 20# Stren Blue

24" 10# Stren Yellow

24" .030mm sighter material ending in a 2mm tippet ring

24-30" flourocarbon with 4-6" droppers attached the the tippet using double surgeons knot.
