The Penns Creek proposal was originally to change it to C&R, artificials only, and this proposal came from the commissioners.

Another reason may be that they wanted to try a slot limit. Other states have done this. It's been talked about for years here in PA. But this will be the first slot limit regs area in PA. If it works out here, they may try it elsewhere, particularly other "trophy regs" areas.

Troutbert,

Thanks for the clarification about the original artificial lures proposal.

I was thinking about the slot limit concept this evening and trying to remember if there were any trout streams in PA managed with this regulation. I couldn't think of any off the top of my mind. Thanks for clarifying that this will be the first one. I agree that it probably won't have much effect on population dynamics.... but the PFBC should be commended in my view for being willing to give the slot limit concept a try here in PA.
