I'm a fan of the change on Penns creek. I've seen bait guys take some real nice fish out of the trophy section. The big pools below Coburn get fished pretty hard with minnows and worms and I feel strongly that harvesting fish over 14" has a detrimental impact on that section.

I dont' really expect to see a big change in the number of 14"-17" fish from this reg. There are plenty of those fish in Penns now and I don't see that number changing too much. Where I think we may see a change is an increase in the number of fish in the 18"-22" range. It doesn't take very much harvest to put a dent in that population.
