That is looking pretty good.

Charlie's tutorials are always worth looking at: [Bead Head Prince Nymph](#)

Apparently even Doug Prince tied many different variants of this basic pattern, so there is no right way. And nobody knows what the heck the fish think they are eating when they take this, so details like the hackle may or may not be important. On the other hand, sticking to a "standard" pattern will get you to a fly that has ben evolved to be effective. Personally I do add the hackle and skip the bead. Tie them to make yourself happy.

Mike.
