Water temp in low 60's high 50's. Started fishing around 4:45 and was surprized to see the hatch coming off (Isonichia, BWO, Light Hendrickson, Light Cahill). Missed one over 16" on an emerger and switched over to nymphs. Landed 4 and missed enough to curse. Switched to #14 light hendrickson and didn't get a look. another hatch came off @ 6:00. Switched back to nymphs and landed 3 more on a light olive caddis pupa.

P.S. I'm going back to catch that large one this weekend!!! 🤔
