When the OP said no YOY, he meant "almost" no more healthy YOY.

For you to say "nonsense, there are still YOY" is only mixing up the idiots in charge of fixing it..... if it can be fixed at all??

I'll have to post some pix of years ago when I would catch >100 healthy smallmouth with my fly rod in the clean, fish filled Lower Susquehanna.

1WT,

Perhaps that is indeed what he meant to say.

I would really prefer a scientific and honest discussion of the problems in the lower Susky - not hyperbole. Here's the latest and best info on YOY. It shows the poor recruitment....but the YOY are indeed there.
