It will work but...as you continue to practice a couple of things to focus on. Try to get your chenille wraps tighter or closer to one another. Tie the tag end of chenille down a little better behind the head and snip the thread closer.

The tail on this weenie looks like two pieces? Like you either cut the loop or tied it with two pieces of chenille somehow. Never seen that. Standard green weenie is one continuous piece of chenille.

Just keep tying and focusing on the basics of thread management, materials placement, proportion, etc. You will improve and I think enjoy the added aspect of catching fish on your own ties.
