The big question is how to fillet/clean the fish...I've only ever done it one way, but I watched hundreds of youtube clips on all I got was more confused!

Maybe I can help you?

Most important, put the trout on old newspaper. Use a electric fillet knife (I like those new Rapala knives the best) and after you fillet the fish, then skin it.

Now, toss the trout in a trash-can and eat the newspaper! You can broil the paper for about ten mins. If the newspaper starts to burn, just put a little water on to put the fire out!

Yummie!
