W. D. Wetherell is one of my favorite authors. Like Thomas McGuane, he is a novelist as well, and the fishing books he has written are more inspired than deliberate. You can tell he wrote Vermont River because he had to; the muse compelled him, and that emotion shows in the descriptions and themes woven within the prose.

The way Vermont River ends -- at the source -- is as wonderful as any of my own climbs along the laurel and hemlock banks of Pennsylvania's mountain brook trout water.

p.s. I just recently learned the "W." stands for Walter. Here is a good interview with the author:
