Im curios if you allowed to fish here? I just helped my cousin move to an apartment right by the Conservation area and there some great looking water running by her place. I see posted signs before the Conservation area but after the sign for the Archibald Johnston there isnt any that i can see. Its located at the a 3way intersection Santee Mill Rd , Altonah Rd, and Township Line Rd. I looked for the Archibald JOhnston area on <http://fishandboat.com/mpag1.htm> couldnt find anything.

I was thinking its either completely off limits or since its a conservation it would be special regs.

Any ideas?
