Tried what? Indicator nymphing? Euro nymphing techniques? Competitive fishing?

If you are asking about what techniques I've tried, I tried them all and without the limitations of competition, they all have a time and place. This was my original point I was trying to make. The second point I was making was that the rules of competitive fly fishing limit the techniques available for use by the contestants. It shouldn't be surprising that the USA team uses "euro" techniques also.
