dc,

You bet. One of the fish I caught today was a 7" dink but he was just stunning: bright orange dorsal edge and crimson flank and belly with round, brilliant blue parr marks - wish I took a picture. The wild rainbows in the Cumberland Valley are just gorgeous. Sometimes the old, big fish can get a bit pasty but when they are up to about 15" or so, they're really pretty.

Some of those spots you and I fished over a quarter century ago are virtually unchanged.
