I plan (key word is plan) to do some fishing in the NC part of the state this year and am looking for some input. Im not looking for your GPS coordinates to your favorite hole/parking spot but would rather get some constructive information on the numerous streams in the Tioga/Potter area. Our camp is outside of Galeton and Im curious as to what streams are worth while both bait and fly? I havent fished up there for the better part of 13 years (probably longer) Id say but when I did we hit Pine Kettle and some smaller streams I dont know the name of or remember how to get there. Any pointers would be great.

Also wouldnt mind meeting up with anyone that might be in the area when/if I get a chance to get up there.
