Great river, lots of fish! The outlet on the East Branch holds some big fish. If you wade across the stream and walk up next to the outlet, just look over the wall! I've caught some great fish there. There is a sign posted that prohibits wading past a certain point, but it is an easy cast to the shelf that the fish hold on.

As for lakes and browns spawning, I would have no clue. But I would guess it more than likely that fish are entering the stream from the dam, with the amount of water that has been let out of the dam in the past few months.
