My first fish on the fly was a smallie on a Wooly Bugger in Pine Creek.

If you want to party with the sunnies til your bored (and catching anything on a fly rod is a blast for me!), put on a black stonefly under an indicator. My nephew and I walked a small creek in VA one afternoon, and after 30 minutes I had to let him walk ahead because I was pulling all the sunnies off every likely spot with the stonefly. Quit when they finally tore it apart.
