I just wonder how many stockies die because they have been caught over and over again and now refuse to eat?

It is better to catch and eat stockies when approaching the summer months because of warm water conditions.

When they stock in the fall - catch and release should be for all. 😊 I enjoy eating crappie more than any warm water fish. Bass are good as well.

Cooking preference: I will use parsley, celery salt, butter and a splash of lemon/lime and cook it over charcoal.
