Bear in mind that at least 80% of my FF will be warm water for smallies, rockbass and sunnies.

Looking for feedback....thanks

That's not really that great of a warm water/bass selection. You have a lot of classic trout patterns on that list that won't see much action, or just be fodder for bluegills.

If you're serious about bass and panfish, these should be the priority from your list:

Wooly Buggers	sizes 8 & 12	chartreuse and black
Jansen Minnows	8	silver/shad
Poppers (eg Boogle Bug)	4/8	chart, yellow, black
Foam Terrestrials (hoppers/gurglers/ants/beetles)		yellow/brown/green
EH Caddis		

I would also add a variety of clousers, some rabbit strip flies like zonkers, and also clouser crayfish or similar crayfish pattern.
