I also would like to put in a plug for the Conestoga River. In many areas it is very wadable and there is just a ton of opportunities there. It is a really good WW fishery. As far as panfish go, last season I caught rock bass, crappies, green sunfish and some of the most beautiful redbreast sunnies that I have ever seen. These fish weren't all dinks either as most of them were caught on size 4 Clousers or pencil poppers as I was primarily targeting Smallmouth Bass. I think the part I really enjoy about fishing the Conestoga is that you just never know what species you are going to tie into next. Good luck.
