ebroe is correct, you will need permits for any in stream improvements. And land owner permission for stream side work. I would start with the WCO and the local conservation district.

My local conservation district has permits from PAF&B and plans that extend out years in to the future. These things take time, but are well worth doing correctly or else your efforts may be removed. I have been involved with a quite a few de-constructions of home-made improvements on wild trout streams by locals. It's a vicious cycle where I'm sure they are surprised to come back each year to see their dam and pools have been removed.
