This is one thing i found from our commission. i am really interested in this. I know a few landowners who will be on board with this as well, and found a fellow PAFF member who also sees the potential in this stream. I think I may put up some streamside pictures when i get a chance to show you how it looks as of now.

Looking at the pdf i posted the link to. You can see that many of the improvements may be minor but can make big differences. Being a mechanical designer the drawings that are provided are great reference points as well.
