I have gotten to know that stretch a bit this past year, mainly fishing below the dam for a stretch. Fish with spin and fly rod and sometimes toss a big plug. No sign of muskies above or below the dam. Above the dam is hard to fish with all the trees and brush right up to the water with the exception of one side right at the dam. Maybe this summer I will explore upstream a ways. Check the stream reports on the Swattie. I have posted a couple times as have some others. I love living in Hershey. Can't beat fishing and enjoying a concert at the same time!
