Thanks. I am going to try and head this and possibly get a few more guys in the area with me. Through the other club i am involved with we are working with DEP to get a few mine drainages cleaned up. The main one is the Hughes borehole that wipes out the entire Little Conemaugh. I think that Amfire Coal, is supposed to fix this but am not positive on this. I can only hope. This stream, if restored all the way to Johnstown would be the best stream in Cambria County. I hope to one day fish the lower end.

Until then all I can do is focus on the area that can be fished now I guess.
