Dear pennypack,

Just loosen your wader belt as you walk along the bank from one hole to another.

I have to do that or otherwise once I wade to mid thigh depth I start floating.

Someone said breathable waders help but they must have different breathable waders than I do, or else they don't wear a wading belt?

My experience is that farts are like what happens in Vegas, farts released in waders stay in waders!

Regards,

Tim Murphy 😊
