You cheated and cut the tips.

Try this:

Take the stacked hair out of the stacker with your left hand.

Transfer the bundle to your right hand, keeping your finger tips two hook shank lengths from the tips.

Measure the bundle by holding it above the hook shank. The wing should extend to the back of the hook bend.

Pinch the bundle in your left hand fingers at the hook eye.

Cut the butts of the deer hair (not your fingers) a hook eye length in front of your fingers.

From this point until you whip finish, don't let go of the bundle.

This works every time.

Why size 16? 12's and 14's are what you'll need shortly. Start out with the 12's....
