Hey guys. So im down in the Pittsburgh area again for work and looking to possibly do a bit of fishing down here during my stay. One stream that is close by to where I work according to the paflyfish map is Little Chartiers Creek. I however looked on the PF&BC website and saw that there were no recent stockings done to the stream. Is this a spring trout season only stream or are there any stockings done by the TU chapter?? It looks like a good stream so im hoping it is.
