I purchased a used sage typhoon backpack off of ebay. Sage stopped making the typhoon so I went ahead and bid on an ebay one and won it. It didnt cost a lot of money, so if I dont like it I will check out the simms roll top backpack. Waterproofing isnt the biggest deal. I can thow it in a waterproof bag if it starts to rain. I just like the feature of being able to pack my waders and boots on the outside of it while hiking.

Thanks,
