I don't know if you've thought of it yet but before you put the hair in the stacker make sure you comb out all of the under fur first, the hair will stack nicer for you. You can use any comb try to find one with the tines close together, you don't really need one of those really expensive brass ones. Yes you're fly will take trout, you're on your way with it, like said above stay with the pattern, set each one down in front of you so you can see it then you can make the adjustments you need to on the next one.
