They dam is gone and it has not seemed to change much but it is nice that fish are not stuck below that dam like they used to be.

I fish that area often near bendigo and its not bad you have to work for your trout and they usually are not working on the surface.

Habitat wise not much was done other than remove the dam there is some decent holding water there now but thats about it.

I wish the papermill could get rid of their dam its the only thing that prevents an easy trip upstream for the fish. There is a fish ladder there but I am not sure how well it works now.
