Getting closer....

If you don't want to wait for your stackers to arrive, just take a prescription pill bottle and cut it in half length-wise. You're old - I know you've got some pill bottles laying around. 

Set your clump of deer hair in the half bottle, tips to the bottom. Hold the bottle at a 45 degree angle to the table, and tap the bottom of the bottle on the table several times. Viola - even tips.

It still looks like you're cutting the tips of the deer hair. Don't reuse the left overs - a patch of deer hair is cheap and will last you a long time.
