For me, a Coastal Carolina University baseball cap which I picked up from the university bookstore clearance rack for 5 bucks. It used to be black but is now more of a faded brown. There are many rips in the fabric and also sweat marks as I won't wash it. I did just get a tan boonie hat for free from a relative that I am thinking about trying out this season. The wife laughs at me when I wear it, but it does fit nice. Hats are important to me. I have only a little hair left and I shave my head so they are necessity. It's funny how attached one can get to a hat. I need a better way to organize my hats. They are scattered all over the house!
