How is this duplicating others work when this upper section of stream, to the best of my knowlege, has not been touched by TU. They have it listed on the mountain laural branch website. They talk about it but I have yet to see them do anything in the area that fishing is being done right now and trout are plentiful. Or within the area of the stream I am looking to try to improve.

<http://www.mltu.org/littlecon.shtml>

"Fish and wildlife do occupy pockets of habitat on several Little Conemaugh tributaries. There were beaver and high value wetlands in the headwaters and Kokomo Run. Ben's Creek, Howell's Run, Big Laurel Run, Noel's Run and the North Branch and South Fork of the Little Conemaugh are stocked with trout by the Pennsylvania Fish & Boat Commission."

They are not even mentioning the headwater of the Little Conemaugh that I am talking about. within this. Not seeing any notes of anything being done on this section of stream.

I was planning contacting this chapter, among other sportsmans groups, in the area, and such once the section of stream is added to the program. I was actually hoping to use this to vicariously "bridge the gap" among these groups, and realize that conservation is important, and we can impact the local streams in Cambria County.

I am not against asking TU for help on this, I just want to get my ducks in a row on this first.

So before firing out accuations please know all of the facts.
