I finally got out to fish for trouts for first time since october and decided to fish the little lehigh on tuesday because I was working in that area and always want to fish this stream and it was nice out and the trouts were rising a lot so i saw what you saw. I tried lots of flies before getting luck and then caught lots on a small black beetle and big one was a rainbow near 20in. This place is nice and i will fish it more because there are lots of trouts in it.
