You should talk to Mike whenever he decides to fly north again. He is as good a tier as anyone, has some unique/innovative patterns, and is really in tune with your local waters/bugs. Not cheap, but if you want something that's gonna work well on those picky June midgers in the flats pool...he is gonna be able to help you more than someone in Philly. If you don't want to go that route for whatever reason, then the guys at International Angler or Erie Ultimate could probably put together a custom tied selection for you. They all fish that water often enough to know what's up.
