Got a response back from the PFBC. It was pretty grim. Due to the current cuts the Habitat division had to set up priorities of streams. Unfortunately the Little Conemaugh was not on the list.

I had asked if I fund this totally through my organization, and acquire the DEP permits if I can still complete any improvements. I hope that this will be a yes, and they can possibly send a biologist to complete the assessment form.

Until then it looks like it will just be the stream clean up. I have also asked if any of the other streams in my area are on the priority list, and see if we can make improvements on them.

Thank you for all of the insight on this. I will keep trying.
