I think you should also consider what type of fishing you're doing too. If you're tossing big meaty flies on big streams/rivers then yes I'd recommend an 8wt or a long 7. If you're fishing small poppers, nymphs, smaller streamers, on medium streams then a 6 would do. Now this is all assuming you're JUST using it for this purpose. If you want it to do other jobs like salt, steelhead, etc, then factor that in.
