Actually, I think you were closer to the headwaters up in Lebanon. What part of Leb. Co. were you at? I fish the Upper Tully quite a bit in Lebanon, Myerstown and above. Great wild trout fishing, if you can find access....

I thought the stream started at Blue Marsh lake in Berks county? Wouldn't that mean Lebanon county was the tail end of the stream? Maybe the stream's a little longer than I was thinking...

I fished it in Myerstown, actually! Right behind the "lakeside" quarry is where I generally went. There were lots of little wild brown trout in that area that were very willing to take a size 14 adams. It was always a lot of fun. Great place to learn to fly fish, I think.
