Got to work with djs12354 in person today on his cdc/elk tying.

He also got a comparadun down pat the first shot. Nice work Dave!

A few tweaks here and there, and he's doing much better on the cdc/elk. Now tie up a bunch more. 

Here's a shot of the comparadun tied with a lot of hand holding.....

It will be a while before the training wheels come off.

Thanks again for the help!

Second picture is one I just tied on my own. Looks like the deer hair is just a little sparse. Body could be better.

Opinions?
