Im looking for recommendations on line wt before i decide on a new rod (leaning towards St. Croix Avid or Orvis Clearwater) but im trying to decide on length and wt. I fish a lot of small mountain streams for wild brookies and browns but i also make approx 6-8 trips to erie for steel every year along with fishing bigger PA streams also. I mainly fish nymphs on indicator tandem rigs but also fish streamers and dries in that order. Should i be looking at 5 wt or 6? and what length 8'-9'?? Any help is appreciated
