URL:

5 small dry fly compartment boxes specific for hatch period (ex sulphur and March Brown)

Large foam nymph box

3 large streamer boxes added when necessary. 1 is bass specific.

1 yarn egg box

1 estaz egg box

1 small stream dry box

1 small stream nymph/streamer box

On days I'm spending all day on the water I carry about 4-5 boxes. When I'm hatch chasing, or on a spinnerfall, then I just carry those and try not to be disappointed if the fish aren't rising, because that's my goal. And I just use a small pack and put in the essentials for that trip. Nice to pack light in those occasions.

I tried to be more organized about 2-3 years ago and it does help.

does this mean you need some more fly boxes????? 😊
